Hello

I just want to take this opportunity to express my thoughts on the lighting project that Jacomb competed for St Ann's Community. Over the last few years we have had many large projects on our campus. Thanks to the professionalism of Jacomb it was one of the smoothest we encountered. Bill Gauthier and his staff were a big part of why this project even happened. Although we needed to do some upgrading it can be difficult to decide which way to go. Jacomb spent many hours researching our facility to see what would work best for us. The original project called for the retrofitting and relamping of 1400 fixtures at the end it was over 1800 fixtures. Thanks to a lot of hard work by Bill and his staff we were able to get the project partially funded through a grant. This made it an easy project to get approval from the management. It has been a great system. We have recently added to the system and I hope to add more areas in the future. I would highly recommend Jacomb to anyone who is looking into any lighting projects in the future. It is a pleasure to deal with a company that delivers what they promise.

Thank You
Chuck Skellen
